Version 4.4.0.1 – for C.F.Toolkit 4.3.2

Bug Fixes

KryptonTreeView

Now it draws the nodes bgcolor correctly.

KryptonTabControl

Fixed the SizeMode = Fixed

Version 4.4.0.0 – for C.F.Toolkit 4.3.1

Breaking Changes

KryptonTreeView

The **KryptonTreeView** has been renamed to **KryptonTreeViewExt**, so you have to change your design code to reflect this change. This action has been taken for have a new KryptonTreeView that better reflects the look and feel of the Krypton Toolkit.

If you want to use the new one, you can delete all the lines in error, and replace the line with:

```
... = = TreeViewDrawMode.OwnerDrawAll;
```

With

```
... = TreeViewDrawMode.OwnerDrawText;
```

New Components

KryptonTreeView

This component is a *Kryptonized* version of the standard *TreeView*. You can use this in place of your existing called to *TreeView* by using a simple search and replace.

KryptonWizard

This control from ProgressiveDeveloper has been added to the Toolkit.

StarRatingControl

A new StarRatingControl has been added to the Toolkit. In this bulk version only integer values are accepted. The star design routine is exposed.

KryptonBorderedLabel

This control is a KryptonLabel with a square border around.

LxLedMeter and KryptonLxLedMeter

This beautiful control (<http://www.codeproject.com/KB/miscctrl/SegmentedLEDControl.aspx>) has been added to toolkit, and a Kryptonized version has been developed.

Scrollbars

In alpha stage. You have to drop the skin container on the form (designer) and then put on it the control that you want to skin: RichTextBox, ListView, GridView, ...

Normal KryptonScrollbars are present too.

Updated Components

KryptonListView

This control has been updated to better integrate into the Krypton Toolkit, but you can revert this rendering via a new property called: **UseKryptonRenderer**. The control has been rewrite for better performance and integration.

Bug Fixes

KryptonListView

Now it displays correctly even in classic mode

Integrated Palettes

All the palettes are integrated, and can be easily accessed via code, this is a sample code for Win7 palette:

```
KryptonPalette Pal = new KryptonPalette();  
    this.kryptonManager.GlobalPalette =  
AC.ExtendedRenderer.Toolkit.Palette.LoadKryptonPaletteWindows7(Pal);
```

Included Palette:

- Asphalt
- Chrome
- Cream
- Green
- Hazel
- McLane
- Plastic
- Windows 7

List of Major Controls

This is a summary list of controls included into the Extended Renderer Toolkit

KryptonRelated

- KryptonCalendar
- KryptonAquaGauge
- KryptonLxLedControl
- KryptonKnobControl
- KryptonColorChooser
- KryptonMessageBox
- KryptonTabControl
- KryptonFlatTabControl
- KryptonWizard
- KryptonBorderedLabel
- KryptonCollapseContainer
- KryptonGrid
- KryptonGroupBox
- KryptonImageComboBox
- KryptonLabel
- KryptonListView
- KryptonPanel
- KryptonProgressBar
- KryptonPropertyGrid
- KryptonShadowLabel
- KryptonSlider
- KryptonTimeFrame
- KryptonTreeGridView
- KryptonTreeView
- KryptonTreeViewExt
- HSkinControl
- VSkinControl
- KryptonScrollBar

Standard Controls

- DataBar
- DataChart
- LxLedControl
- SlidingScale
- StarRatingControl
- ProfessionalCalendar
- CustomtabControl
- AnalogClock
- GaugeControl
- GroupableListView
- ImageCombo
- IPAddressControl
- LoadingCircle (and ToolStrip Item)
- PrintableRichTextBox
- ProgressBar
- ScrollingLabel (and ToolStrip Item)
- ShadowLabel
- TimeFrame
- WatermarkedRichTextBox
- WatermarkedTextBox
- DataGridView Miscellaneous Columns Type (Progress, UpDown, OkFail, Colored,...)
- TreeViewPrintHelper
- FadeForm
- ScrollBarEx
